

EXPERIENCE

Associate Software Engineer | Firstsource Solutions Limited Dec 2024 – Present

- AI-Powered Resume Parsing Application**
Tech Stack: Node.js, React.js, JavaScript, MySql, OpenAI, JSON, REST
 - Designed and developed a full-stack AI-powered resume parsing application using Node.js for the backend and React.js for the frontend.
 - Integrated the OpenAI API to extract structured information (skills, experience, education, and other key attributes) from unstructured PDF and DOCX resumes.
 - Implemented prompt-engineered extraction logic to match candidate profiles with job descriptions (JD) and generate relevance-based resume rankings.
 - Improved backend response efficiency by implementing optimized asynchronous REST APIs using async/await.
- Higher Education Tool**
Tech Stack: React, Node.js, MySQL
 - An internal corporate application that allows employees to apply for and manage their higher education benefits.
 - Employees can submit initial enrollment requests for educational programs and later submit reimbursement requests for their expenses upon completion.
 - Features a multi-tier approval system that automatically routes requests to the appropriate stakeholders
- Email Automation**
Tech Stack: Power Automate
 - Designed and implemented automated workflows to send exit and welcome emails to employees based on defined triggers and business logic.
 - Created structured flow logic and flowcharts to ensure accurate email delivery and process reliability.
 - Developed desktop automation flows to eliminate repetitive manual tasks by automatically downloading files and storing them in designated locations.

Full-Stack Intern | CAI Technologies Pvt. Ltd. Feb 2024 – Sep 2024

- Built a responsive dashboard UI in React based on Figma designs using Chakra UI, improving user engagement and reducing page load times.
- Developed a brand analysis API using Python and FastAPI, improving data processing efficiency and reducing data retrieval latency.
- Integrated real-time financial charts and data visualizations to support faster and more informed business decision-making.

EDUCATION

B.Tech. - Information Science and Engineering

CMR Institute of Technology, Bengaluru Dec 2020 - June 2024
Key Courses: Data Structures, Data Science, Machine Learning

SKILLS

Programming Languages: Python | JavaScript | SQL
Front-End Development: React.js | HTML | CSS | Tailwind CSS | Responsive Design | React Router
Back-End Development: FastAPI | Node.js | RESTful APIs | Authentication (OAuth2, JWT)
Databases: MySQL | PostgreSQL | SQL Server
Tools and Technologies: Docker | AWS | Visual Studio Code | Redis | Git | GitHub | Power Automate
Core Concepts: Data Structures and Algorithms | Object-Oriented Programming (OOP) | Database Management Systems (DBMS) | Computer Networks

PROJECTS

- Bulk Emailer**

 - Developed a cold mailing tool that allows users to upload recipient email IDs, subjects, and attachments, and automatically send emails to the respective recipients.
 - Integrated Gmail API to send emails, track delivery confirmations, and log errors for failed deliveries.
 - Implemented functionality to auto-generate email IDs using first and last names when the domain already exists in the database.
- NiveMart**

 - Developed a responsive full-stack shopping website using React, HTML, CSS, and Chakra UI, featuring secure Google OAuth authentication and backend support for dynamic product management.
 - Built the backend using FastAPI and documented all APIs using Swagger for easy testing and integration.
- Financial Intelligence**

 - Assembled a platform using React.js and React Router with secure login and loan application forms, increasing form submission rates by 30%.
 - Built a robust backend with FastAPI, integrating Alembic for seamless database migrations and Poetry for efficient dependency management and environment support.

ACHIEVEMENTS

- Solved around 150+ DSA Questions. <https://leetcode.com/u/NiveditaG/>
- Women Techmakers member - <https://developers.google.com/profile/badges/community/wtm/member>
- Google Cloud Skills Boost - <https://developers.google.com/profile/badges/skillsboost/earned-badge>

ONLINE COURSES

- Python Programming for Beginners (Udemy)
 - Python Functions for Data Science (Coursera)
 - Full Stack Web Development Bootcamp with React and Python (Udemy)
- Object Oriented Programming in Java (Coursera)
 - Object Oriented Concepts (Coursera)
 - Software Engineering for Beginners (Udemy)
